Re: 99P-1340/CP 1

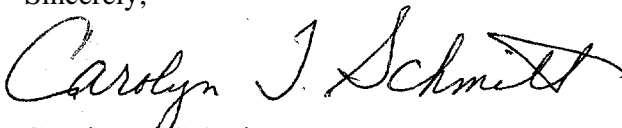

Petition to Have "Eternity eau de parfum" Misbranded

Dear Sir or Madam:

I am writing because I fully support the petition submitted in May 1999 by the Environmental Health Network (EHN) to have Calvin Klein's "Eternity eau de parfum" declared misbranded. "Eternity" contains known toxic chemicals, as well as chemicals that have not been tested for consumer safety. The chemicals in many common fragrance products can be dangerous to a child's growth and future health. Uninformed parents, teachers, day-care workers, and others can buy "Eternity" and not know they are injuring the children in their care. Most people don't realize that perfume or cologne can cause these health problems; that is why any product that contains dangerous chemicals, or chemicals whose health effects are unknown, must be labeled.

I would appreciate your department correcting the above product safety.

Sincerely,

Carolyn T. Schmitt
